

The image displays a complex network graph visualization. The graph consists of two main clusters of nodes, one colored blue and the other pink, connected by a dense web of black lines. Each node is labeled with a number and a type (e.g., '76 (type1)', '310 (type2)'). The blue cluster is on the left and top, while the pink cluster is on the right and bottom. The nodes are arranged in a hierarchical, tree-like structure within each cluster. The blue cluster contains nodes labeled with 'type1' and the pink cluster contains nodes labeled with 'type2'. The connections between nodes are represented by black lines, forming a dense web between the two clusters.
